PLC Team SMART Goal

Current Reality:

According to national, state, and county statistics, there is a gender deficit in the number of female students entering technology careers. http://www.huffingtonpost.com/ucla-inst-of-the-environment-and-sustainability/women-in-stem_b_4381516.html

Goal:

To have 100% female participation from the Introduction/Advanced Web Design classes in the Michigan Council of Women in Technology's Web Design contest for the entire state of Michigan. Moreover, at least six teams, from either the introductory or advanced categories should place as a finalist. All of Bloom's taxonomy will be used with a focus on application, synthesis, and evaluation. Not only does this competition highlight the talent of our web design program, it also gives positive promotion to the school itself.

Strategies and Action Steps

Using bethetigger.edublogs.org as the platform for instructional information, students will review HTML learn and CSS coding to embed within their website. They will also be given tutorials using Photoshop Elements 9 and Photoshop CS6. The directions for the contest will be reviewed thoroughly. Each student will be required to create their entire website from content to design with

up to one other person. Working collaboratively is an important skill set for all students. Contest requirements are outlined at <http://www.mcwtwebdesign4girls.net/>.

Timeline

Trimester I September 2014-November 2014 <http://www.mcwtwebdesign4girls.net/about-the-competition/calendar/>

Evidence of Effectiveness

Announcement of finalists via email to all contestants and teachers will be delivered on Saturday, November 29. Finalists' presentations, followed immediately by announcement of winners and presentation of prizes will take place on Saturday, December 6 at the Blue Care Network Auditorium in Southfield.
